

Transparent Payment Processing

Online Payment processing solution

Transparent Payment Processing lets you accept credit cards on your site. It also lets you accept orders by phone, fax, and mail – in any currency. Instead of having to manage several payments processing relationships, Transparent Payment Processing simplifies your entire process and routes all transactions to our United States clearing account enabling you to manage and withdraw funds using SWIFT bank wire, check, or select debit cards . Transparent Payment Processing brings popular payment processing technologies to your business.

Give your business a boost

- ▶ **Complete** - Save time and money while meeting all your processing needs through a single vendor.
- ▶ **Quick** - Get started right away. Integration and set-up are simple.
- ▶ **Secure** - Reduce your fraud losses with industry-leading security and fraud protection tools and SSL encryption.
- ▶ **Proven** - Transparent Payment Processing brings you technology that is preferred by millions of shoppers, and increases sales by an average of 14%.*

"Transparent Payment Processing simplifies our business. All our transactions are automated with a single processor relationship, which means there is no need for data collection or manual processing. I would highly recommend this solution to make your life easier."

-Joseph Larson, Director, Whiteslate LLC
